

## Izunokuni City Citizens' Charter

Located in the northern part of the Izu Peninsula, Izunokuni City is nestled between the majestic Mount Fuji and the clear water of the Kano River.

We have inherited world-class historical heritage, including the Nirayama Reverberatory Furnaces, and a rich culture nurtured in the community.

We, the citizens of Izunokuni, hereby established the Citizens' Charter in order to create a city with our own hands where everyone can live happily while respecting each other's diversity.

We will:

- build warm relationships with people so that everyone can live in peace.
- protect the nature, history and culture inherited from our predecessors and pass them on to the future.
- nurture the children of the future together with everyone in the community.
- harness the power of the community and open the way to the world.
- create a city where all people are valued.

Established on April 1, 2025.
